

Welcome to the Voyager User Alliance Website!

The Voyager User Alliance site is a password protected site. This allows Dynamic to share proprietary information with Voyager User Alliance members while ensuring member privacy on the VUA discussion forum.

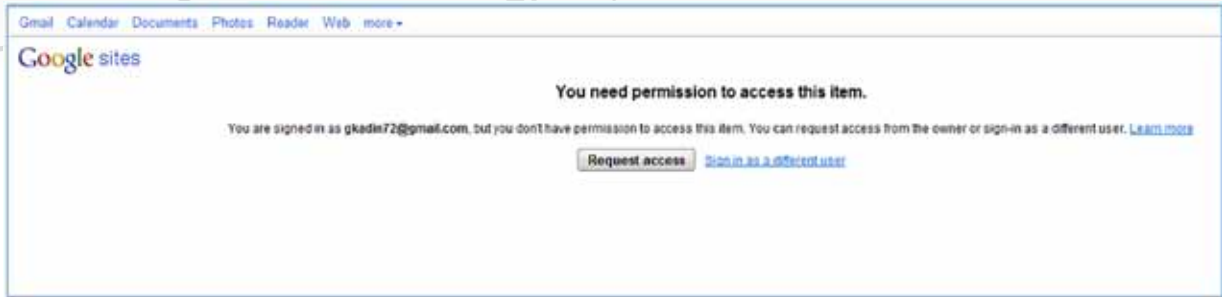

If you qualify for VUA membership, please follow the instructions below to access the site:

Go to www.voyagerua.org — this is the screen you will see:

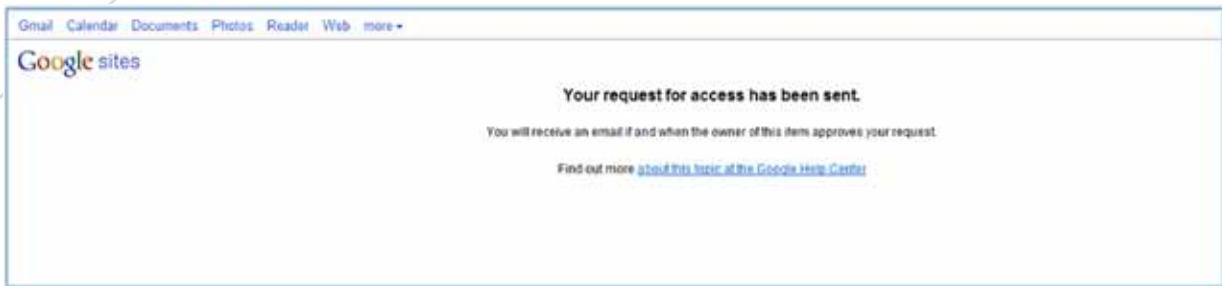

If you already have a Google Sites ID, simply enter it in the login box on the right. If you don't have a Google Sites ID, click **Sign up for Sites**. Fill in all of the requested information to create an account. **Note:** You don't have to create a new Google email account. You can use any email address you already have (work, msn, yahoo, etc.) to login to Google Sites.

When you have completed your **Google Sites** registration, go back to the www.voyagerua.org page and attempt to log in. A screen will pop up — [click request access](#).

You will receive a confirmation that your request has been sent.

Once your membership has been approved, you will receive an email from Gretchen — gadin@dynamichealthsys.com.

Click on the [voyageruseralliance](#) link embedded in the email. You should now be able to log in to the VUA site via the Google Sites login page using your previously created login.
